

WACADS Group Inc.

We Automate Companies And Develop Successful Strategies

Looking to enhance customer acquisition, conversion, retention, and cost-savings? WACADS Group Inc. is your solution! We specialize in developing customized AI and automation solutions for repetitive activities in organizations resulting in employee retention, meaningful customer experiences, sales acceleration, operational resilience and business automation - all vital to your company's success.

Why is this important?

It boils down to savings. Gartner reports that 91% of businesses are pursuing digital initiatives, and 87% of senior leaders prioritize digitalization.

- WACADS Group Inc. improves customer acquisition, conversion, retention, and cost-savings.
- We reduce repetitive tasks to retain employees and create meaningful customer experiences.
- Our focus includes sales acceleration, operational resilience, and business automation.
- Firms that embrace AI and automation to boost efficiency, drive innovation, and outperform competitors with our custom solutions.

Industry Challenge

- Small fleets (95.8%) move 72.6% of U.S. freight, contributing significantly to the economy.
- Soaring fuel costs (80.7% of \$940.8 billion freight bill) pose a critical financial challenge.
- A trucking halt would deplete grocery store stock in three days, affecting essentials and vital services.
- Trucking's sustainability hinges on addressing high fuel costs and embracing AI and automation to produce faster, adaptable supply chains.

EquiAccess

WACADS Group Inc.
We Automate Companies And Develop Successful Strategies

Our Process can streamline business workflows, automate routine tasks and give rise to a new generation of business applications.

Our Solution for Transportation & Logistics

Our automation solutions collaborate with WG Learn to share data with traffic management teams, scheduling departments and produce analytics that enhance supply chain tracking.

Common Misconceptions about Automation & AI in Healthcare

“AI and automation like self-driving trucks are designed to replace actual drivers and supply chain workers”.

Myth: These technologies can perform routine mundane tasks, optimize routes and rely on the creativity and problem-solving capabilities of humans earnings.

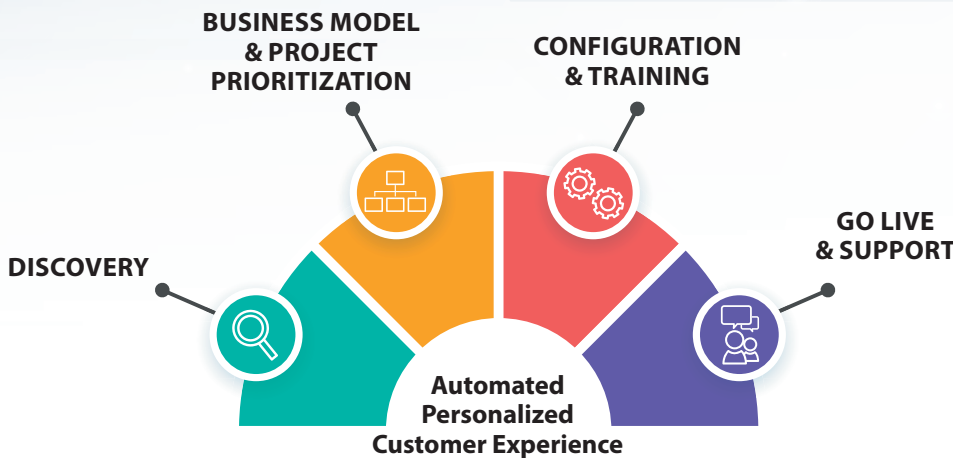

Competitive Differentiators:

- Using an agile framework our standout team combines software engineers, machine learning specialists, and solution architects to create proven customized AI and automation solutions.
- Our solutions go beyond boundaries, embodying Environmental Social Governance (ESG) values, making sustainability a defining feature of our innovations.

Clients:

“Liz Cripps and her team at WACADS provide professional and detailed support. Their ability to attentively listen to client’s needs and provide collaborative solutions is something anyone can expect when working with them”.

DISCOVERY

This stage identifies your immediate and long-term requirements. A project charter detailing the scope, stakeholders and corresponding project management plans, time estimates and budget are agreed upon.

We are agile. Our work is based on incremental growth, with pre-negotiated timeframes. This ensures the project progresses quickly and cohesively.

BUSINESS MODEL & PROJECT PRIORITIZATION

Together, we create prototypes, wireframes, and process maps that delineate workflows, improving project clarity and fostering the achievement of optimal outcomes.

CONFIGURATION & TRAINING

Our technical team implements the agreed upon solution. We provide relevant progress reports, training scenarios and hands-on engagement to empower your team and validate requirements through the development process.

GO LIVE & SUPPORT

We collaborate closely with you to foster staff user adoption, and provide ongoing maintenance to keep your solution up-to-date as your needs evolve.
